If you really like trippy, psychedelic twin-stick shooter action, then this game is for you! I personally gave it a heavy "meh". It was fun but just not my style of game. It tries to be Geometry Wars all hopped up on Red Bull.. Video of gameplay: <https://youtu.be/vqgmVzWVWY8g>

This game is a great concept for VR. You are legless, sitting on the ground from your waist up. You can climb, crawl, & fling yourself anywhere you want on the map, even up trees! There are powerup cards that rest on your forearm and you throw them to use them. This ranges from magic windwinds to rocket launchers on your shoulders. You have a regular laser gun at your hip to use as well. Hopefully more people pick up this game because I could only find one lobby with one person in it. I think bots is a must for this game, otherwise there won't be a big enough players right now.

Pros: Awesome concept
Movement is smooth and managable
Lots of powerup types

Cons: Everything is blurry/grainy at distance. Anything more than 4 feet in front of you.
This is multiplayer only, no bots. Without a playerbase this game will not last.
.Nice atmosphere, mechanics are well-introduced and easy to apply, and the puzzles are pretty nice so far. Having an option to speed up the movement is nice.

I had one brief moment of camera issues when the golem got too far away from me, but that's the only issue I've seen. Would recommend to friends.. Kudos, Skot.. This game is a complete joke. I would not wish this game on my worst enemy. The best thing about this game was the loading screens. There is 4 different areas to the map and I only tried to go into one of the other areas but as soon as I got to a tunnel I hit a loading screen and then it crashed. Unless they have some major updates I would NOT BUY THIS. I don't even know if I would play it if it was free. This is the worst game I have ever played in my entire life and will NEVER be buying a UIG game again this is complete trash. I just livestreamed this game but it is still processing so I can't give you the link but I will leave the link to my channel and you to take a look at it once it is done processing. I streamed for about an hour and somewhere I had audio issues but I left a review at the very end when it froze (shocking). If my link doesn't work just search for SubXero Entertainment on YouTube and you should be able to find us.

<https://www.youtube.com/channel/UC7Krv7R8f1y9pT1GZadRYwA>. The epitome of a hidden gem. Eloquent, open gameplay in a retro JRPG turn-based shell. What an absolute delight.. came for the occult mystery stayed for the pain. +I love the missions
+Nice airports

-Bad scenery (you can get good scenery free or paywre)
-Bad sound on voice

If you can get it on sale, do it. no game pause working no save game just shoot until the end so dumb so fun.... Anna is so much explosive fun. As she says indeed, "such a rush!"

Risk of Rain is a bit wonky.

It's a lot of your standard rogue-like fair, on top of a pixelated two-d side scroller. The main focus is on time and completing things as fast as possible. The longer you take, the stronger your enemies get comparatively. You can explore for items, but there's a trade off. It's an interesting risk-reward mechanic if not a little stressful.

The first fifteen to twenty minutes of every game delivers on this core idea and it's great. The issues come as you move into the more mid to late game from twenty minutes to let's say no more than an hour for a game. In this period, the enemies get bloated. Upgrades are mostly focused on utility, so your damage doesn't scale with the enemy health bars. It goes from solid game play to a frustrating bullet hell where you are looping around easy patterns and scoring the easy hits. Despite how the trailers look, I found the game play extremely meticulous, rather than frantic.

It's still a cute game though. The presentation is great. There's plenty of characters and upgrades to unlock. And it is fun in short bursts.

The real issue here is that it doesn't stand up to other rogue-likes. There are a crap-ton of great games in the genre, and I can think of at least five off the top of my head that are better. So I would recommend this game to people who are fans of the genre and are looking for something new. Go play the other games first, then come back to this one when you need a breath of fresh air or something new.

Please note, I am unable to comment on the co-op, which is probably a big plus. Not the only rogue-like with co-op, but they mostly don't have it.

6/10. Wonderful music, amazing visuals, touching story. This game should be a point of reference for all art games, both on mobile platforms and regular gaming systems.

More than a game, it's a life experience. Completing this game is something you will never forget.

Cosmic friends forever.. perhaps Arma's best feature. Can't get into a game... The Lobby keeps on closing... It freezes up (not in game of course)... Can't play the story line, it just sits there and thinks.... Tried changing the video settings, it just freezes up when I click on a different setting... Spent an hour rebooting and making sure my files are legit... Got nowhere... Was really excited to get this.. Really sad I can't play... :(BTW, I spent \$100.00 and it won't work.... A very polished game, when playing it's easy to see that a great deal of care went into crafting every single asset of this game.. as she was the best fighter in deception and too op in Armageddon, she is a beast here just like she was used to. fairly overpowered, best character in the combat pack.. Simple short game. But was challenging at first until you get used to the handling of the helicopter. For the price, fun to play and have in your library.. just 80 mb and very fun to play with friends or against bots
